

Concentric orange pattern rings encircling the bird — test your choke / pellet pattern at typical pigeon distance

Pattern testing — hang at 20–30 yards.

**Score: Outer ring = 1 pt · Middle ring = 2 pts · Inner ring = 3 pts · Bird body hit = 5 pts**

Print at 100% scale (NOT fit-to-page) — bullseye + ring diameters are realistic.

How to use: Print at 100% scale. Hang at 20 to 30 yards — typical pigeon distance. Count pellet hits inside each concentric ring to evaluate your choke and pellet pattern; body hits on the silhouette are kill shots.
