# Diamonds & Great Ones

How a diamond is decided, and a tick-list of the 13 Great One species.

## HOW A DIAMOND WORKS

**1. Level.** Every animal has a difficulty level from 1 to 10. Each species has its own maximum. Diamonds come from animals at (or near) that maximum, so a **Mythical (8)** or **Legendary (9)** animal is the one to chase.
**2. Trophy rating.** The medal is set by the animal's trophy rating (antlers, horns, tusks or weight) against thresholds for its species. Diamond is roughly 90% or more of the species' maximum.
**3. Harvest check.** A clean kill with ammo rated for its class keeps the medal. Wrong-class ammo, extra damage or multiple hits can downgrade it.
**4. Fur is separate.** Fur colour does not change the rating. A rare fur on a diamond is a separate collectible.

## DIFFICULTY LEVELS

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|---|---|---|---|---|---|---|---|---|
| Trivial | Minor | Very Easy | Easy | Medium | Hard | Very Hard | Mythical | Legendary | Fabled |

Level 10 (Fabled) is for Great Ones only. Check an animal's level and, with the right Spotting Knowledge, its trophy rating range through the binoculars, and skip animals that cannot reach diamond.
